Ventura County *Farmers' Markets* List

We can all help support our local farmers

According to the Farm Bureau of Ventura County, the estimated gross value of Ventura County crops is \$1.8 billion. Farming and farm-dependent businesses provide an estimated 31,000 jobs in Ventura County, more than any other sector of the economy. Agriculture and agriculture-related businesses account for about 4.4% of overall economic activity in Ventura County, generating \$2.1 billion in revenue and \$76 million in indirect business taxes annually. One in ten county residents relies to some degree on income derived from farming.

By eating local and shopping at our farmer' markets, we'll create more dollars that will circulate back to local-area farmers and create more demand for local food items and diversity in our crops – all of which will help our local farmers, our economy, the environment and ourselves.

Here is a great list of Ventura County Farmers' Market
